A Reason Code/Message will Appear on Remittance Advices when Claims are Cutback

Effective with claims processed on or after December 22, 2014, when claims are cutback for any reason, a corresponding reason code and message will also appear on remittance advices to assist providers in reconciling their claims. For example, recent claims that cutback for edit code 0640 (Maternity/Newborn stay allowed limit for vaginal or C-section) also received reason code 198 (Precertification/authorization exceeded).
